Climate and Adaptation

Knowledge Management Center

A Center for Excellence in Climate Knowledge Management

Managing by:

LEDARS

Local Environment Development and Agricultural Research Society

http://www.ledars.org

Context

Climate change is overwhelming Bangladesh where the southwest coastal region is the most affected area. The community people have indigenous knowledge and best practices which are not recognized. The existing development projects lack proper initiatives to integrate indigenous and scientific knowledge and promote research works.

With the support of Bread for the World, LEDARS has established a Climate and Adaptation Knowledge Management Center with a view to accumulating global, local and indigenous knowledge into easily accessible formats. Community people, local school and college students, youths and researchers from different universities are privileged through this knowledge hub.

KMC Promotes Renewable Energy

The whole campus of LEDARS including KMC is run by 20 kw Hybrid Solar Power System promoting the use of renewable energy.

Our Facilities

Laboratory for water & soil testing

Dormitory for Researchers

Conference Hall & Reading Space

Research Grant for Young Researchers

Digital Archive & Library

Climate & Adaptation Technology Park

About LEDARS

LEDARS (Local Environment Development and Agricultural Research Society) is a non-profit and non-political organization registered by the Social Welfare Department and NGO Affairs Bureau, working for the social, economic, and environmental development of the poor and marginalized people of the southwest region of Bangladesh since 1996. LEDARS is very much engaged with climate change, climate resilience, gender development nature base solutions, environmental conservation, drinking water, WASH, livelihoods, youth development projects, etc. Till now LEDARS has obtained several national and international awards including the Zayed Sustainability Prize 2023, for its innovative and sustainable initiatives. LEDARS is working with marginalized communities like landless, marginal farmers, schedule casts, labour, and women-headed families, children, and adolescents.

Observer Organization of UNFCCC
